

12 Days of Winter Break

Don't Melt the Ice!

What You Need:

- materials that might be good insulators (packaging wrap, cotton balls, straw, towels, paper, old T-shirt, etc.)
- ice cubes
- containers or boxes with lids

Photo from frugalfun4boys.com

Instructions:

1. Layer the insulating material in one container.
2. Put some ice cubes in your container and close the lid.
3. Choose another insulating material and repeat with another container.
4. Put the containers in an area away from direct sunlight or heat.
5. Check on the ice cubes to see which ones melt quicker.
6. Try different insulating materials to see which work best!
