

12 Days of Winter Break

Snowflake Slime

What You Need:

- 1/4 tsp of borax powder (found in the laundry detergent aisle)
- 1/2 cup clear washable school glue
- 1 cup of warm water divided into 1/2 cups
- glitter and/or snowflake confetti

This seasonal slime will provide hours of fun!

Instructions:

1. Add glue and 1/2 cup of water to a bowl and mix together.
2. Mix in the glitter and/or snowflake confetti to your desired amount. Adding too much could make your slime break apart.
3. Mix borax powder into a 1/2 cup of warm water to make your slime activator solution.
4. Add the borax solution to the water and glue mixture. Combine well.
5. After mixing, knead the slime until you have the consistency you want.
