

# Exploding Stick Bomb

**Materials Included:**

- 10 craft sticks

Photos from instructables.com

**Instructions:**

1. Cross two sticks into an “x” shape (see left picture). Slant the sticks so that there are two obtuse and two acute angles. The stick on top will be stick 1 and the stick on bottom will be stick 2.
2. Add stick 3 by tucking one end under the end of stick 2. Stick 3 should go over stick 1.
3. Add another stick by tucking its end under stick 2 and letting the rest lay over stick 3.
4. Continue adding sticks like the pictures until you have reached the desired length. Just remember that patience will pay off and the longer the stick bomb, the longer explosion show you will have.
5. Add a stick under both ends, but over the middle stick. Remove the stick and stand back!
